

# Patented Medicine Prices Review Board

## 2019–20 Departmental Sustainable Development Strategy

April 2019

### 1. Context for the Departmental Sustainable Development Strategy

Although the Patented Medicine Prices Review Board (PMPRB) is not bound by the *Federal Sustainable Development Act* and is not required to develop a full departmental sustainable development strategy, the PMPRB adheres to the principles of the Federal Sustainable Development Strategy (FSDS) by implementing the *Policy on Green Procurement*.

The *Policy on Green Procurement* supports the Government of Canada’s effort to promote environmental stewardship. In keeping with the objectives of the policy, the PMPRB supports sustainable development by integrating environmental performance considerations into the procurement decision-making process through the actions described in the “FSDS goal: low-carbon government” table in section 2.

### 2. Commitments for the PMPRB

#### FSDS goal: low-carbon government

FSDS target	FSDS contributing action	Corresponding departmental action(s)	Support for UN Sustainable Development Goal target	Starting point(s), target(s) and performance indicator(s) for departmental actions	Link to the department’s Program Inventory
Reduce Greenhouse Gas (GHG) emissions from federal government buildings and fleets by 40% below 2005 levels by 2030, with an aspiration to achieve it by 2025.	Support the transition to a low-carbon economy through green procurement.	Ensure that decision-makers have the necessary training and awareness to support green procurement	SDG 12.	Baseline 2017-18: 100% Target: 100% of procurement and/or material management decision makers have completed the required Canada School of Public Service Procurement courses or their equivalent by 2020 Performance indicator: number of decision-makers with the necessary training to support green procurement	Internal Services

FSDS target	FSDS contributing action	Corresponding departmental action(s)	Support for UN Sustainable Development Goal target	Starting point(s), target(s) and performance indicator(s) for departmental actions	Link to the department's Program Inventory
Reduce Greenhouse Gas (GHG) emissions from federal government buildings and fleets by 40% below 2005 levels by 2030, with an aspiration to achieve it by 2025.	Support the transition to a low-carbon economy through green procurement.	Set departmental targets to reduce environmental impact of specific goods or services: <ul style="list-style-type: none"> <li>toner cartridges and paper purchased are <b>from</b> reused or recycled <b>material</b></li> </ul>	<a href="#">SDG 12.</a>	Baseline 2017-18: 100% Target: 100% of toner cartridges and paper purchased are <b>from</b> reused or recycled <b>materials</b> by 2020 Performance indicator: number of toner cartridges and paper purchased out of total number purchased in the fiscal year that were <b>from</b> reused/recycled <b>materials</b>	Internal Services
		<ul style="list-style-type: none"> <li>e-waste is disposed of in an environmentally sound and secure manner</li> </ul>	<a href="#">SDG 12.</a>	Baseline: 2017-18 100% Target: 100% of e-waste is disposed of in an environmentally sound and secure manner by 2020 Performance indicator: number of pieces of e-waste disposed of in an environmentally sound and secure manner out of total number of pieces of e-waste disposed of in the fiscal year	Internal Services

### 3. Integrating sustainable development

The PMPRB will continue to ensure that its decision-making process includes consideration of FSDS goals and targets.

The PMPRB is commencing implementation of Workplace 2.0 standards, renewing the physical workplace and contributing to sustainable development through a reduced carbon footprint per person. The implementation is expected to be completed in fiscal year 2019-20.

The PMPRB will continue to maximize its use of PSPC common use procurement instruments, such as standing offers and supply arrangements, and integrate environmental considerations into procurement processes.

In addition, the PMPRB always considers the following factors when making purchases:

- Reduce Use – the PMPRB purchases only what is necessary and reuses as much as possible.
- Use of Standing Offers – PSPC is continually renewing standing offers for the most commonly procured goods and services and additionally increasing the integration of environmental considerations.
- Look for Environmental Certifications – there are now reliable environmental labels and standards widely adopted by the industry, including EcoLogo, Green Seal, ENERGY STAR and Electronic Product Environmental Assessment Tool (EPEAT), which make it easy to identify environmentally preferable goods.
